

**How can you contribute?**

Find more information related to  
what we offer and try to make  
it as attractive as possible

**HVET IN CAREER DEVELOPMENT AND LIFE LONG LEARNING**  
For many individuals who aren't ready for academic studies, HVET is an important possibility for career development in a life long learning perspective.  
**How can we make this happen?**

Building programmes with good reputation

Compare with university exams

**Best practice?**

Think of good  
Embassadors!

**Most important?**

Work based learning  
- multidisciplinary work  
- never finish of the 2  
- can be used over!  
Train the trainers!

To collaboration  
between the SK  
and the sector  
Diverse lead

Career guidance

Public provide  
career services

Marketing the  
value of the 10 years

With a correct guidance  
at the end of the 10 years

**How can the quadruple helix contribute?**

**How can you contribute?**

Developing the  
vertical attitude  
to innovation of the  
young people

DEVELOPING CREATIVITY AS A  
SUPPORT TO INTRODUCING INNOVATION  
IN COMPANIES

"Kerätyö" (Finland)  
"Bifabrikken" (Denmark)

**Best practice?**

**HVET IN INNOVATION**  
With new perspectives on  
innovation, it is recognized  
that innovation doesn't  
necessarily happen top-down,  
but bottom-up, through users  
and company employees.  
Which part can HVET  
take in this?

Check the creativity of  
the business!

IT IS IMPORTANT TO TAKE IN  
ACCOUNT THE LIFE OF HVET AND  
THE LABOR MARKET, IN TERMS OF  
NEW OPPORTUNITIES

Train the students in a shop context, in real projects,  
together with company experts by projects.  
=> innovation

**Most important?**

\* It is important that  
the manager understand  
that innovation doesn't  
come only from university,  
but also from HVET  
experience on the different  
job profiles

\* It is important also that  
students & managers that  
also HVET and not only  
university is a driver of  
innovation

As a former recruiter I know  
that companies value HVET and  
working experience a lot.  
One prefers that (if one can prove it)  
to just theoretical education.

Set up a network of companies/  
services & HVET  
to regularly discuss  
on HVET opportunities

**How can the  
quadruple  
helix contribute?**

Develop more  
collaboration between  
the 4 helix  
Add an eye to the other

**How can you contribute?**

*How can you contribute?  
- How to contribute?  
- How to contribute?  
- How to contribute?*

**Best practice?**

*Technical-scientific committee  
regularly meeting with teachers  
companies and university (IT Sustainability  
ITALY)*

**HVET CONTRIBUTING TO COMPETENCE DEVELOPMENT IN LOCAL ECONOMY**  
**How can the quadruple helix work together in order to be up-to-date about regional market demands?**

*Build bridges between companies, branch organisations and educational providers.  
e.g. "Local Competence Com Organisations"  
(- needs right people as coordinators)*

**Most important?**

*Improve local "Programme Advisory Board's"  
Improve National "Programme Advisory Board's"  
What communication exists between the local & National Programme Boards today? Does it work?*

*Projecting with schools (teachers) on local development curriculum & win-win*

**How can the quadruple helix contribute?**
